# LANDSCAPE MANAGEMENT

## ASSESSMENT

We have a certified team of professional arborists, horticulturists, and landscape professionals with decades of experience. Our team will perform a landscape assessment, which is a complete review of all aspects of your current landscaping.

## ACTION PLAN

We will generate a detailed report and recommendations of the findings. The initial assessment is used to develop a proper improvement plan which is crucial to maintain and increase the value of your property.

## SUSTAINABILITY

In addition, throughout the many years of our working relationship we will help mitigate risk by making on-going recommendations for proactive methods of protecting, preparing, and improving all aspects of your landscape.

# 4 STAGE PROCESS

Your landscape management program is broken down into 4 crucial stages. It is key to our success to work together through these steps as a team.

## 1. IMPROVE

maintenance techniques by utilizing knowledge and experience to maximize aesthetics while minimizing your resources

## 2. REDUCE

spending by analyzing and modifying the current landscape budget to best accommodate your individual goals and priorities

## 3. PLAN

and invest for your future by completing improvement projects that will increase your property value

## 4. HELP

you sustain the process with discipline by repeating steps 1-3 with the goal to always continue to learn, improve and evolve.

# 4 STAGE PROCESS

## STAGE 1

### Improve Maintenance Techniques

- Irrigation
  - Sprinkler Coverage
  - Clock Programming
  - Minor adjustments
  - Seasonal Adjustments
  - Precipitation Rates
- Grass
  - Weed control programs
  - Seasonal nutrient applications
  - Aerate and dethatch
  - Mowing
- Plants
  - Treat each species differently
  - Seasonal cutbacks
  - Natural pruning to promote flowers
- Trees
  - Complete Trimming Plan
  - Correct tree stakes
- Rock
  - Blow, rake and evenly disperse existing material

## STAGE 2

### Reduce Spending

- Irrigation
  - Complete irrigation inspection
- Grass
  - Turf conversions causing damage or waste
- Plants
  - Selective removal
- Trees
  - Remove dangerous & unsightly trees
- Rock
  - Erosion and drainage projects
  - Trip hazards

## STAGE 3

### Plan and Invest

- Irrigation
  - Phased system replacement
  - Upgrade controllers
  - Re-engineering and upgrading
- Grass
  - Turf conversions for aesthetics
  - Turf additions
- Plants
  - Replacements
  - Installs
- Trees
  - Selective removal and replacement plans
- Rock
  - Replenishment plans

# IRRIGATION MANAGEMENT

When we start as your landscape manager, we will perform an in-depth irrigation inspection. This will help all of us understand the current condition of your irrigation system, components, and its ability to efficiently meet the watering needs of all plants and trees on your property

Based on the information gathered from our inspection, we put together a comprehensive list of recommendations to ensure your system operates as efficiently as possible. These solutions are designed to keep your landscape healthy while reducing wasteful spending.

- List of Recommendations
- Pictures & Locations
- Project Estimate
- Return on Investment
- Upgrades to Technology
- Redesigns & Retrofits
- Future Management Tools

480-249-3555

## PROBLEM

Water is the largest expense for every landscape

## SOLUTION

A complimentary irrigation inspection and recommendation to reduce water usage

## RESULT

Execute the recommendations through a collaborative plan to reduce water and save money

## INSPECTION PROCESS

### MAINLINES

Meters  
Backflows

### CLOCKS

Age & Condition  
Display & Operation  
Electrical Outputs  
Programming  
Manual and Automatic Operation

### VALVES

Boxes/Enclosures  
Flow Control & Diaphragm  
Solenoid/Wiring Connections  
Manual and Automatic Operation

### GRASS

Sprinkler & Nozzle Size  
Coverage & Distribution  
Leaks & Function  
Precipitation Rates  
Overspray  
Leaks  
Water Waste  
Age & Condition

### PLANTS & TREES

Application Rate  
Leaks  
Emitter Size & Location  
Efficiency  
Coverage

# IRRIGATION - STAGE 2

**REDUCE** spending by analyzing and modifying the current landscape budget to best accommodate your individual goals and priorities

After inspecting every valve box, clock, back flow, wiring system, drip sections and grass areas, we highly recommend performing a complete detailed irrigation assessment when/if we start as your landscape manager.

# IRRIGATION - STAGE 2

**REDUCE** spending by analyzing and modifying the current landscape budget to best accommodate your individual goals and priorities

After inspecting every valve box, clock, back flow, wiring system, drip sections and grass areas, we highly recommend performing a complete detailed irrigation assessment when/if we start as your landscape manager.

# GREEN GRASS

Grass is one of the most important parts of any landscape. Our intense grass management program will produce results.

## ALL INCLUSIVE PROGRAM

Grass requires proper irrigation, soil, nutrients and sunlight to grow healthy and green. We've built a program to include all of these.

- Soil Tests
- Nitrogen
- Phosphorous
- Potassium
- Soil Amendments
- Wetting Agents
- Iron
- Acid/PH/Salt Treatments
- Weed Control
- Insecticide
- Fungicide
- Aeration
- De-thatching
- Scalping
- Over-seeding
- Set Mow Heights

# GRASS - STAGE 1

**IMPROVE** maintenance techniques by utilizing knowledge and experience to maximize aesthetics while minimizing your resources

Perform turf care program with proper mowing techniques, seasonal nutrient applications, aeration and dethatching, proper and weed control programs

# GRASS - STAGE 1

**IMPROVE** maintenance techniques by utilizing knowledge and experience to maximize aesthetics while minimizing your resources

Perform turf care program with proper mowing techniques, seasonal nutrient applications, aeration and dethatching, proper and weed control programs

# G R A S S - S T A G E 3

**PLAN** and invest for your future by completing improvement projects that will increase your property value

Define rock and grass areas with borders

# PLANT MANAGEMENT

An important part of managing your landscape assets is monitoring plant inventories. Over time, loss and maturity is to be expected. Understanding and budgeting for a reasonable amount of plant replacement is key to improving your property and staying up to date with modern plant palettes and design standards.

A landscape containing attractive plants increases property value and aesthetic appeal.

# PLANTS - STAGE 1

**IMPROVE** maintenance techniques by utilizing knowledge and experience to maximize aesthetics while minimizing your resources

Perform seasonal cutbacks to ensure a healthy growing season for plants. Seasonal cutbacks also increase the sustainability of the plants by reducing their water requirements and regulating the size of the plant for the space they are in.

# PLANTS - STAGE 1

**IMPROVE** maintenance techniques by utilizing knowledge and experience to maximize aesthetics while minimizing your resources

Perform seasonal cutbacks to ensure a healthy growing season for plants. Seasonal cutbacks also increase the sustainability of the plants by reducing their water requirements and regulating the size of the plant for the space they are in.

# PLANTS - STAGE 1

**IMPROVE** maintenance techniques by utilizing knowledge and experience to maximize aesthetics while minimizing your resources

Perform seasonal cutbacks to ensure a healthy growing season for plants. Seasonal cutbacks also increase the sustainability of the plants by reducing their water requirements and regulating the size of the plant for the space they are in.

Perform seasonal cutbacks to ensure a healthy growing season for plants. Seasonal cutbacks also increase the sustainability of the plants by reducing their water requirements and regulating the size of the plant for the space they are in.

# P L A N T S - S T A G E 2

**REDUCE** spending by analyzing and modifying the current landscape budget to best accommodate your individual goals and priorities

Removal and replacement of select plant species that are unsightly or have outgrown their space / lifespan.  
Create a sustainable plant pallet to avoid future loss and improve aesthetics.

# PLANTS - STAGE 2

**REDUCE** spending by analyzing and modifying the current landscape budget to best accommodate your individual goals and priorities

Removal and replacement of select plant species that are unsightly or have outgrown their space / lifespan.  
Create a sustainable plant pallet to avoid future loss and improve aesthetics.

# P L A N T S - S T A G E 3

**PLAN** and invest for your future by completing improvement projects that will increase your property value

Build plant replacement plan for bare areas where plants have been lost or removed.

# P L A N T S - S T A G E 3

**PLAN** and invest for your future by completing improvement projects that will increase your property value

Build plant replacement plan for bare areas where plants have been lost or removed.

# P L A N T S - S T A G E 3

**PLAN** and invest for your future by completing improvement projects that will increase your property value

Build plant replacement plan for bare areas where plants have been lost or removed.

# T R E E M A N A G E M E N T

We create a personalized tree management program designed for each property's individual needs. Outside of the included tree trimming plan, we proactively inspect your trees and propose any additional services necessary (removals, replacements, installs, etc.) to keep your trees healthy and your property looking it's best!

## A L L I N C L U S I V E P R O G R A M

We focus on the safety and longevity of your assets through proper pruning, nutrition, and preventative treatments.

- Remove diseased, dead, and damaged branches
- Perform thinning, reduce size, weight, liability
- Improve stability, structure and sustainability
- Aesthetic appeal, ground clearance, visibility
- Sustain natural shape and landscape design
- Allow light to filter through to interior branches
- Avoid breakage/unforeseen emergency corrections
- Competing limbs, crossed or rubbing branches

T R E E I N V E N T O R Y : Sample Property

TREE ID	SPECIES	SIZE	TRIMMING DETAIL	FERTILIZATION
1001	Palo Brea	L	Seasonal trim, keep elevated above parking and walkways	Bi-annually
1002	Palo Brea	M	Seasonal trim, keep elevated above parking and walkways	Bi-annually
1003	Palo Brea	S	Seasonal trim, train structure	Bi-annually
1004	Palo Brea	S	Seasonal trim, train structure	Bi-annually
1005	Palo Brea	M	Seasonal Trim, keep clear for traffic	Bi-annually
1006	Sisso	L	Seasonal trim, maintain for building signage	Bi-annually
1007	Sisso	L	Seasonal trim, maintain for building signage	Bi-annually
1008	Sisso	L	Seasonal trim, maintain for building signage	Bi-annually
1009	Sisso	L	Seasonal trim, maintain for building signage	Bi-annually
1010	Mesquite	M	Seasonal trim	Bi-annually
1011	Mesquite	L	Seasonal trim	Bi-annually
1012	Mesquite	L	Seasonal trim	Bi-annually
1013	Mesquite	L	Seasonal trim	Bi-annually
1014	Pine	M	Light trimming, watch for stress	Annually
1015	Pine	M	Light trimming, watch for stress	Annually
1016	Pine	M	Light trimming, watch for stress	Annually

# T R E E S - S T A G E 1

**IMPROVE** maintenance techniques by utilizing knowledge and experience to maximize aesthetics while minimizing your resources

Perform annual palm tree trimming

# T R E E S - S T A G E 1

IMPROVE maintenance techniques by utilizing knowledge and experience to maximize aesthetics while minimizing your resources

Perform regular all-inclusive tree trimming:

Remove diseased, dead, and damaged branches | Thinning, reduce size, weight, liability  
Improve stability, structure and sustainability | Aesthetic appeal, ground clearance, visibility

# T R E E S - S T A G E 1

**IMPROVE** maintenance techniques by utilizing knowledge and experience to maximize aesthetics while minimizing your resources

Perform regular all-inclusive tree trimming:

Remove diseased, dead, and damaged branches | Thinning, reduce size, weight, liability  
Improve stability, structure and sustainability | Aesthetic appeal, ground clearance, visibility

# T R E E S - S T A G E 2

**REDUCE** spending by analyzing and modifying the current landscape budget to best accommodate your individual goals and priorities

Remove crowded, dwarfed, or competing trees to ensure there is proper space to reach a healthy, mature size.

# ROCK RECOMMENDATIONS

Rock and mulch is an asset that slowly diminishes over time. If not planned for, this can be an unexpected large expense. Plan to phase rock replenishment on a scheduled basis, before it becomes an urgent issue.

# ROCK - STAGE 1

**IMPROVE** maintenance techniques by utilizing knowledge and experience to maximize aesthetics while minimizing your resources

Maintain granite areas to a fresh and neat appearance with proper blowing and raking techniques, and chemical weed control programs.

# ROCK - STAGE 1

**IMPROVE** maintenance techniques by utilizing knowledge and experience to maximize aesthetics while minimizing your resources

Maintain granite areas to a fresh and neat appearance with proper blowing and raking techniques, and chemical weed control programs.

# ROCK - STAGE 3

**PLAN** and invest for your future by completing improvement projects that will increase your property value

Build plans to replenish areas where the rock is sparse to improve uniformity and aesthetics and control drainage.

THANK YOU
